February 19 JAMES R. PRINGLE. THE SEEDS OF SICKNESS .- BARON Munchausen tells a story of a post-boy's horn, which had a number of wicked tunes blown into it one frosty night, but made no response. Neverthe less, when it was hung before a hot fire, the tunes. which had been frozen in, thawed out, to the amazement of all present. Just so the human system, subjected to injurious inflaences during the winter, sometimes give no token of the effect they have produced upon it, until the moist armosphere of spring develops their fruit. Many spring disease are the result of wlater imprudences, and great and especial oure should be taken of the system in the old season, so that it may be in a sound and vigorous condition when the malarious fogs of March and April make their appearance. To this end, strengthen the stomach and the general organization at this season with HOSTETTER'S BITTERS. Take this pleasant vegetable antidote in advince of the uprising of the mephitic mists and vapors, which produce chills and fever, and other miasmatic diseases Remember that it is a preventive medicine—as pow eriul to protect as to restore. The stomach is apt to be overtaxed at this time of the year. It is a period devoted to dinner and supper parties, and luxurious livin generally. Feasting and late hours weaken the dige tive organs and disorder the liver. The effeet of the Bitters is to invigorate the one and regulate the other. There is no month in the twalve when a tonic and alte ative is more gene ally needthan in this, and there is no preparation of that nature so thoroughly salubrious, so bracing, and so

selebrated vegetable cordial. THE EXTENT TO WHICH THE ADUL-TERATION of Liquors is carried on in this coun try makes it the duty of the purchaser to investigate the merits of the article offered for sale. It is well known fact that many of the Brandies, Wines, &c., are manufactured from ereness Extracts, Essential Oils and Alcohol, which is poisonous, thereby causing many injurious effects.
